PROFESSIONAL SUMMARY:

Principal-level statistical programming lead with over 10 years of expertise in PK/PD analytics, Base/Advanced SAS, R and R-Shiny application development. Proven track record designing interactive dashboards for real-time decision support, leading global teams, and delivering regulatory-compliant ADaM/SDTM datasets for oncology and beyond. Skilled in workflow automation, talent mentorship, and strategic data visualization to accelerate regulatory submissions and clinical insights.

CORE COMPETENCIES:

• Study Lead Experience • SAS Macros, R and SQL • PK/PD (NCA and NONMEM) • Population PK/PD (POPPK, POPPKPD) • GitHub	• SDTM, ADaM, Define.xml & Pinnacle 21 • TLF (Table, Listing & Figures) • R Shiny Dashboard • Oncology Endpoints • DevOps and Agile Experience
---	--

▪ Statistical Tools:	SAS v 9.4 for Linux Windows SAS R Studio SAS Studio
▪ SAS Tools:	SAS/Base SAS/Macro SAS/Graph SAS/SQL SAS/ODS
▪ Database Tool:	SQL Developer
▪ Operating systems:	UNIX WINDOWS
▪ Version Control:	GitHub
▪ R Packages:	Tidyverse, Shiny, Plotly, Shinydashboard, Devtools & Usethis

SUMMARY OF SKILLS:

- Over **10 years** of hands-on statistical programming experience supporting Phase I–III clinical trials.
- More than **5 years of experience in leading** end-to-end programming activities, mentoring junior programmers, and ensuring deliverables meet timelines and quality standards.
- Developed SDTM, ADaM datasets and TLF reports for oncology and other TA studies.
- Well versed with Oncology endpoints - **BOR, DCR, PFS, TTR, DOR, and OS**.
- Executed comprehensive **biomarker** analyses such as Cytokine panels, ICH and RCL to support mechanistic and translational insights.

- Delivered full **PK/PD** workflows, from SMS2000 raw data through SDTM mapping to ADPC/ADPP non-compartmental analysis and POPPK/POPPKPD population modelling.
- Produced **time-series** concentration plots, median concentration profiles, patient-level PK plots, descriptive statistics tables, and detailed TLF listings.
- Designed and deployed interactive **R Shiny applications** for real-time clinical studies and PK/PD reporting dashboards.
- Proficient in SAS macro programming, and R for advanced analytics, visualization, and automation.
- Demonstrated expert mastery of CDISC SDTM IG v3.2+ (and subsequent releases), ADaM IG v1.1+ (and subsequent releases), and popPK ADaM IG v1.0.
- Consistently applied industry best practices to maintain data integrity and audit readiness.

PROFESSIONAL EXPERIENCE:

❖ IQVIA, United Kingdom

Associate Principal Statistical Programmer, May 2024 - Present

Job Responsibilities

- Served as an EPTM study lead, coordinating cross-functional programming efforts, managing timelines and deliverables, and driving adherence to ICH GCP and internal SOPs.
- Programmed key ADaM datasets like **ADLB, ADQS, ADHOLTER, ADEG, ADVS, ADUC** etc. Authored comprehensive ADaM specifications & SAS programming for **ADPC & ADPP** datasets, ensuring full alignment with CDISC ADaM IG v1.1+ and seamless handoff to downstream PK/PD analyses.
- Led NCA and population PK analyses (ADPC, ADPP, **POPPK, POPPKPD**), generating 150+ TLFs for regulatory submissions under tight timelines.
- Developed and validated Non-Compartmental Analysis (**NCA**) TLFs including tables, listings, and figures to deliver critical PK insights for clinical and regulatory teams.
- Conducted detailed SDTM reviews for PC and PP domains, as well as key safety domains (AE, LB, CM etc.), identifying mapping discrepancies and ensuring 100% compliance with latest SDTM IG.
- Spearheaded a **SAS macro development** initiative, designing reusable, parameter-driven macros that automated repetitive tasks, improved coding consistency, and accelerated ADaM datasets and TLF production.
- Crafted a production-ready **R Shiny dashboard for PK/PD reporting** on CDISC-compliant datasets, enabling real-time visualization of time-series concentration plots, median profiles, and descriptive statistics.
- Extensively worked on Pinnacle 21 validation and ADaM CRT package.

❖ **GSK, Bengaluru, India**

Lead Statistical Programmer, Dec 2018 - May 2024

Job Responsibilities

- Served as Study Lead for a portfolio of Phase I–III oncology trials—including solid tumor and hematologic (non-solid) indications—overseeing end-to-end statistical programming deliverables (protocol review, SDTM review, ADaM programming, TLF generation) and coordinating cross-functional teams to ensure on-time, CDISC- and ICH-GCP-compliant submissions.
- Generated key CDISC safety, PK and efficacy ADaM datasets for such as ADSL, **ADRS**, **ADTR**, **ADTTE**, **ADDATES**, ADAE, ADLB, ADEX, ADBIOMRK, ADPC, ADPP etc.
- Worked on ADaM **Oncology Efficacy endpoints** - PFS, DOR, TTR, OS, DCR & BOR.
- Applied various statistical methods, including Odds Ratio (OR), Relative Risk (RR), Absolute Risk Difference (ARD), Hazard ratio, Fisher Exact, Z-test, KM Quartiles etc.
- Worked on various **SAS graphical procedures** like PROC SGPLOT, PROC SGPANEL and SAS GTL and generated various Box Plots, Line Plots, Scatter Plots, KM Survival Plots, and waterfall Plots.
- Utilized SAS procedures such as PROC LOGISTIC, PROC LIFETEST, PROC MEANS, and PROC FREQ etc.
- Worked on PK/PD reporting and generated key **NCA TLFs**. Created various PK Time Series Plots, PK Summary tables & Listings.
- Created an R Shiny dashboard for the ADaM EX dataset using R-shiny package.
- Created SAS-based tool to automate **SDTM edit checks** and output issue log in XLS.
- As part of the Oncology Focus Group, I was involved in developing standard **SAS macros** and developed standard ADaM specifications as well.
- Involved in mentoring New Joiners (Freshers and mid-experienced Programmers).
- Worked on multiple CDISC study submissions like ISS, DSUR, DRB etc.
- Worked on **ADaM CRT package** creation and Pinnacle validation.

❖ **TCS, Delhi, India**

SDTM Mapping Programmer, Dec 2017 - Dec 2018

Job Responsibilities

- Worked as a Process Lead for Pfizer and was involved in leading SDTM deliverables.
- Worked on Phase I - III Clinical trials involving **PK & Safety** as Primary endpoints.
- Worked in various Therapeutic Areas like **Oncology** and **Arthritis**.
- Developed and Validated CDISC SDTM domains such as Exposure (EX), Adverse Events (AE), Lab (LB), Vital Signs (VS), **Oncology SDTMs** (TU, TR and RS) etc.
- Developed and validated CDISC SDTM domains for PK concentration (**PC**) and parameters (**PP**), mapping raw SMS2000 files into SDTM datasets.
- Developed SDTM define and CRT package.
- Merged raw PC data with SMS2000 TXT files received from the CPMS team.
- Involved in developing various study specific **SAS macros**.

❖ **Accenture, Bengaluru, India**

SDTM Mapping Programmer, Aug 2015 - Dec 2017

Job Responsibilities

- Worked as a SDTM Programmer in various TAs like **Oncology, Vaccines** etc.
- Mapped various CDISC SDTMs such as **Oncology** (TU, TR & RS), **Safety** (AE, LB, EG), **PK** (PC & PP) by following CDISC SDTM IG.
- Partnered with QC teams to validate SDTM domains using SAS programming.
- Worked on blockbuster drug - Keytruda (Pembrolizumab).
- Involved in **SDTM Mapping Spec creation, aCRF Annotation**, Pinnacle validation, programming and validation through PL/SQL programming. Worked on complex **PL/SQL queries** on the SQL Developer tool.
- Worked on SDTM define, pinnacle 21 and CRT package.

KEY PROJECTS & HIGHLIGHTS

- **RAPIDO R-Shiny Dashboard:** Supported programming R Shiny application for safety analysis outputs adopted by global teams (Clinical, MW and S&P teams).
- **PK/PD Shiny Dashboard:** Independently developed real-time interactive PK/PD dashboard enabling real-time visualization of time-series concentration plots, median profiles, and descriptive statistic.
- **R and SAS Macro initiative:** Automated R scripts to validate ADaM and perform SAS SDTM checks reducing manual checks by 70%.

EDUCATIONAL QUALIFICATIONS:

- **B. Tech** (Bachelor of Technology) **Honours Graduate in Computer Science & Engineering** Degree from Rajasthan Technical University, India (2011-2015).
- **HSC** (High School) with **72%** aggregate marks obtained (2010-2011).
- **SSC** (Secondary School) with **82%** aggregate marks obtained (2008-2009).

DECLARATION

I confirm that the information provided is accurate and complete to the best of my knowledge.
